

Managed Information Technology Services

*Networks, Security, Communications,
Cloud Services and more...*

- Are you using technology to improve communication among staff, students, parents, and the community?
- Are your data and network secure, compliant, and accessible 24-hours a day, 7-days a week?
- Do you struggle to successfully adopt new instructional and administrative technology avoiding IT obsolescence?

From preschool to high school and beyond, the question is no longer whether to use technology, but rather how can we make information and technology available, used, and useful for our students, teachers, staff and community.

Educational organizations are turning to Integrity to cost-effectively, reliably, and securely address their unique information technology challenges.

We are your trusted partner for implementing innovative IT solutions.

Managed Secure Internet*

Our flagship solution includes everything you need to address bandwidth challenges. We include enterprise Internet access with world-class support and industrial network security to meet your needs. Our solution is turnkey and provided by experts in technology who specialize in solutions to meet the unique needs of learning organizations.

About CELT

For more than two decades, CELT has helped align leadership, learning, and technology in support of improved student achievement by working collaboratively with educational organizations to support and transform teaching, learning, and administrative processes. CELT's mission is to help learning organizations attain their vision, mission, and goals by integrating high-quality programs, services, and technology with the organization's people and processes in a timely, efficient, and cost-effective way.

CELT is a leader in assessing and designing learner-centered, instructionally focused, and affordable decision support/accountability systems that are valid, reliable, and replicable at the student, classroom, school, school district, state, and federal level. In addition to helping establish data definitions and systems architecture, CELT assists with the alignment of data systems with contemporary research, best practices, proven business processes, and governance policies.
